| github.com/Munsif311

PROFESSIONAL SUMMARY

Software Engineering graduate (University of Malakand, July 2026) specializing in Machine Learning and Deep Learning. Experienced in building and deploying end-to-end AI solutions including computer vision, NLP, recommendation systems, and AI-agent applications delivered as interactive web apps. Proficient in Python, data analysis, and full machine learning pipeline development. Certified by IBM, Cambridge International Qualifications (UK), and DigiSkills.pk, with a strong interest in applying AI and data-driven solutions to real-world problems.

EDUCATION

B.S. Software Engineering — University of Malakand

Oct 2022 – Jul 2026

CGPA: 3.67 / 4.0

TECHNICAL SKILLS

- Programming Languages: Python, SQL, C++
- Machine Learning / Deep Learning: TensorFlow, Keras, Scikit-learn, YOLOv8
- AI / LLM: Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), AI Agents
- Data Analysis & Visualization: Pandas, NumPy, Matplotlib, OpenCV, Data Mining
- Web Development & Deployment: Streamlit,, Flask, Bootstrap,MySQL
- Tools & Platforms: Jupyter Notebook, Git/GitHub, Kaggle, Anaconda, VS Code

PROFESSIONAL EXPERIENCE

Data Mining Intern (Remote) — GAO Tek Inc., New York, USA

Jun 2026 – Sep 2026

- Completed a three-month remote data mining internship with GAO Tek Inc., an international technology firm, contributing to data mining and analysis tasks under company guidelines.
- Applied data preprocessing and pattern-extraction techniques to support ongoing data mining initiatives.

Data Analytics Intern (Remote) — Oasis Infobyte

Jun 2026 (1 Month)

- Completed a one-month Data Analytics fellowship internship with Oasis Infobyte, focused on orientation and hands-on application of data analytics concepts.
- Strengthened practical skills in data analysis through guided, project-based learning.

Machine Learning Intern — Ezitech Institute, Rawalpindi, Pakistan

Jun 2025 – Sep 2025

- Completed a three-month machine learning internship (Performance Rating: Very Good), delivering multiple end-to-end ML projects.
- Built a breast cancer detection model, a car price prediction model, and a movie recommendation system.
- Developed an SQL RAG (Retrieval-Augmented Generation) system using a React-based AI agent for natural-language database querying.

Machine Learning Intern — Cognifyz Technologies

Jan 2025 – Feb 2025

- Worked on data-driven tasks, building and evaluating machine learning models.
- Strengthened skills in data preprocessing, model training, and result interpretation while collaborating with a distributed team.

KEY PROJECTS

Green Vision: AI-Driven Environmental & Security Monitoring for Smart Park *Final Year Project*

- Designed an AI-driven system for a smart park that monitors environmental conditions and security in real time using Python, TensorFlow/Keras, OpenCV, and YOLO.

- Applied computer vision and deep learning models to detect security threats and track environmental indicators.
- Integrated detection, alerting, and a monitoring interface into a single end-to-end pipeline.

SQLite RAG System using AI Agent

- Built a Retrieval-Augmented Generation system enabling natural-language querying of a SQLite database using Python, LLMs, RAG, AI Agents, and React.
- Used an AI agent to translate user questions into SQL queries and return contextual, human-readable answers.

Pneumonia Detection using YOLOv8

- Developed a medical imaging model using YOLOv8 and OpenCV to detect signs of pneumonia from chest X-ray images.
- Handled dataset preparation, training, and evaluation to achieve reliable detection performance.

Additional Projects: Plant Disease Detection (image classification), Safety Equipment Detection App (PPE computer vision), Credit Card Fraud Detection (imbalanced-data classifier), Medicine Recommendation System, Movie Recommendation System, House Price Prediction (regression), Thumbnail Extractor Web App (LLM-powered), Data Preprocessing Web App, Hospital Appointment System, News App (REST API), and Currency Exchange Rate App (live API).

CERTIFICATIONS

- Python for Data Science, AI & Development — IBM (Coursera), Jan 2025
- Supervised Machine Learning: Regression — IBM (Coursera), Jan 2025
- Basics of Artificial Intelligence — Cambridge International Qualifications (UK) / UniAthena, Jun 2026
- Basics of Machine Learning Algorithms — Cambridge International Qualifications (UK) / UniAthena, Aug 2025
- Data Analytics and Business Intelligence (DSTP 2.0) — DigiSkills.pk, Jul 2024
- Python Beginner Skill Certificate (Novice) — TechGig, Times Internet, Nov 2024
- Technical Web Development, Batch 8 — National Freelance Training Program (NFTP)
- IoT Certification — National Vocational and Technical Training Commission (NAVTTTC)

LEADERSHIP & ACTIVITIES

- Finance Secretary — IEEE Student Branch, University of Malakand
- President — Jamiat Talaba Islam (JTI), University of Malakand
- Certificate of Recognition, Bazmi Adab — Govt. Degree College Wari
- Certificate of Recognition, Festivities and Exhibitions — University of Malakand
